

## KEY FEATURES

- ✔ Monitor, record and playback of CAN/Ethernet bus data and digital video data
- ✔ Supports several CAN hardware interfaces
- ✔ Interpretation of CAN/Ethernet bus data by a freely programmable CAN specification
- ✔ Visualization of raw and interpreted CAN/Ethernet data
- ✔ Visualization of sensor targets and objects in 2D or 3D with individual settings
- ✔ Synchronized playback of CAN/Ethernet bus and video data
- ✔ Video overlay of targets and objects
- ✔ Sending of freely configurable CAN and Ethernet messages or defined sensor commands and status
- ✔ Download of sensor firmware (currently only with CAN)
- ✔ CSV export with real-time monitored data or recorded files
- ✔ Increased data rate allows more sensor information in the Drive Recorder Software
