

KEY FEATURES

- ✓ Monitor, record and playback of CAN/Ethernet bus data and digital video data
- ✓ Supports several CAN hardware interfaces
- ✓ Interpretation of CAN/Ethernet bus data by a freely programmable CAN specification
- ✓ Visualization of raw and interpreted CAN/Ethernet data
- ✓ Visualization of sensor targets and objects in 2D or 3D with individual settings
- ✓ Synchronized playback of CAN/Ethernet bus and video data
- ✓ Sending of freely configurable CAN and Ethernet messages or defined sensor commands and status
- ✓ Download of sensor firmware via CAN or Ethernet (Ethernet only for more recent products)
- ✓ CSV export of real-time monitored data or recorded files
- ✓ Sensor configuration via parameter/command/status requests
